About IIRCR

International Institute for Research Communication and Recognition (IIRCR), Indonesia is a non-profit organization for promoting research and development around the world. IIRCR is the bridge between the quality publisher and researchers. It provides the platform to researchers and academicians for publication in the Scopus Indexed Journals, SCI Journals, Web of Science Journals, UGC Approved Journals, NAAS Rated Journals, Google Scholar Indexed Journals and other good quality DOI journals.

IIRCR is also a partner organization for publication in conference proceedings. We organize the International conferences for publication in SCOPUS indexed and other refereed journals as per the requirement of the authors of the manuscripts. The manuscripts submitted to IIRCR should be plagiarism free and well coherent in all sense.

The scope of publication with the IIRCR covers all type of review and research manuscripts including the Exploratory & Explanatory Research, Descriptive & Theoretical Research, Applied Research & Action Research, Cross-Sectional Research, Quantitative & Qualitative Research in the field of engineering & technology, agriculture & environmental, Social science & Humanities, Literature & Education development, Medical & Health Science.

The vision of IIRCR :

IIRCR endeavors to promote global excellence in the field of research & development through diligent applications of advanced technology for the holistic development of society. Also, IIRCR is committed to motivate and persuade the researchers to take up the projects for the continuous development of human society and make this world a better place to live in. The IIRCR has a steadfast commitment be the fulcrum of the ocean of knowledge around which efforts of researchers move about.

About Conference

International Conference on Recent Developments in Social Science and Business Management (ICRDSSBM)

During the worldwide lockdown due to COVID 19 pandemic, a lot of important activities have come to a halt. However, when we look at the brighter side, all of us have more time for adding to our knowledge and insights.

With this aim, to keep contributing to learning and motivation International research and development Center for publication is going to organize a two-day International Conference with the title " **International Conference on Recent Developments in Social Science and Business Management (ICRDSSBM)**" on May 27-28, 2023 through hybrid mode.

We hope, this online mode of the conference in COVID-19 pandemic will be an appreciable step in promoting the research activities and new information between researchers, developers, students, academicians and practitioners working in and around the world by keeping the social distance in view to stop the spread of COVID-19 disease. This conference aims is to present the current researches being carried out in the field of social science and education development around the globe.

Prospective authors from academia as well as industry are invited to submit their abstracts that illustrate original/unpublished works and industrial applications describing advances and significant innovations in the field.

Message

I am extremely pleased to share that International Research and Development Center for Publication (IIRCR) is organizing a two days **International Conference on Recent Developments in Social Science and Business Management (ICRDSSBM)** on May 27-28, 2023.

I am sure the state of art lectures from the invited experts and the research findings of researchers, academicians, utility engineers will enrich the knowledge of all the participants. It will provide an excellent opportunity for3 students to learn new ideas.

I offer my best wishes to the whole team of the organizing committee, the participants, and volunteers for the grand success of the conference.

Md. Nazir
Convenor **ICRDSSBM** -2023

Message

I am happy to know that International Research and Development Center for Publication (IIRCR) is organizing a two days International Conference on Multidisciplinary Research & Practice (ICMRP) on May 27-28, 2023. I am sure that, this conference would provide an ideal platform for the academicians, scholars and experts to present and exchange their research findings and Ideas.

I wish the conference a great success.

Online education among the students of library and information science in Croatia

Darko Lacović

Faculty of Humanities and Social Sciences, University of Osijek, Croatia

Abstract— Covid-19 pandemic has affected the way in which people work. In many professions employees have to conduct their obligations from home. University teachers also had to change their working style and to perform some or most of their educational activities in an online environment. This presentation will shortly describe some findings from the most recent research that are dealing with online learning in higher education during COVID-19 pandemic. Several available studies show that authors have mainly explored the attitudes of teachers and students towards new forms of virtual education, their satisfaction with the digital technology that is used for online teaching and learning, and the difficulties which they encountered in the process of distance education. From a position of Assistant Professor I will talk about a personal experience of online education in which participate students of library and information science at the Faculty of Humanities and Social Sciences from the University of Osijek (Croatia). Mostly I will present information and communication technology which I use for online teaching (a platform for e-learning Moodle and virtual classrooms), explain their possibilities, and refer to some of my teaching methods, tasks and assignments for students in order to achieve learning outcomes of my online courses. Moreover, I will describe some advantages and challenges related to interaction with the students during virtual classes, their motivation for distance learning etc. The purpose of this report is to offer some practical information to university teachers from similar scientific fields and to give them potential ideas in organization of their teaching sessions. In other words this presentation will offer some examples of distance learning practice which can be useful for university teachers who apply online education in the circumstances of the current pandemic.

Abstract— The COVID-19 pandemic has worsened social, economic and political inequalities. This communication focuses special attention on the microsocial level and the stigmatization that can potentially arise in cases of SARS-CoV-2 (infection at the origin of COVID-19 disease). Mobilizing Goffman's classic concept: stigmatization while the situation of individuals who are disabled for full social acceptance according to the regular social expectations, we analyze the socially unequal form as infected with the SARS-CoV-2 coronavirus live this situation in different ways (for example, by their social, economic, cultural) being that the most negative representations associated with discredit and are socially associated, on a regular basis, to individuals with scarce resources.

Abstract— Other issues including health, education, social, economic, cultural, and other issues are connected to the challenge of poverty. The government must pay close attention to the expenditure component because it directly determines how much money is spent, which has an impact on the poverty rate. Based on the foregoing, this study will talk about how government spending on health, education, and subsidies affects poverty in Indonesia. The secondary data used in this study spans an annual period from 1994 to 2022 and is presented as annual data. Regression analysis is the quantitative tool used in this investigation. Variable X1 (subsidy) has an impact on Y (poverty). In line with rising subsidies, poverty rises. These findings suggest that the government's budget for subsidies is less focused.
